

Why you cannot Wake People up. Transkript vom 28.07.2023.

good morning everyone not such a nice day here today overcast but anyway it's winter what do you expect um okay so there's a bit of conversation going on in the chat group uh on telegram it's not too big a conversation it's just you know a few comments here and there and I just thought I would give a bit of information we've all been and if you're listening to me then you know this resonates with you this this is relevant to you over the last few years um we've all been trying to wake people up sharing information letting everybody know what's going on and how a particular two-year health issue was a lie I'm being very selective with my words um how how that was all a lie and you know what the governments were doing and their agenda and how the um the spear in the arm was was dangerous and and full of this we've been we've been sharing information we've been doing all of that okay and so many people are saying I can't wake anyone up they're all asleep they're all sheep they're it's like you talk to them and they just staring into staring into space and they got this glazed look over their face or they they turn around and they shoot me down as a conspiracy theorist or a lunatic and in the crazy Farm there's a reason for that and I want to share um what that reason is why people don't see it why they're still so indoctrinated still so brainwashed and unable to think for themselves so we live on a planet that has been heavily heavily shot down in regards to vibrational frequency meaning we've almost had a blanket over our reality on this planet so that we find it almost impossible to raise our vibrational frequency now what happens when you raise your frequency is your awareness expands because you have access to more of life so I'll give you an example if you are sitting in a fish tank right a large fish tank you're sitting in the large fish tank um you will only see what is going on in your immediate surroundings around you okay so you're not going to see what's going on behind the rock over there you're not going to see what's going on behind the boat over there you know you're only going to see what you can see in your direct line aside while you're sitting in that fish tank when you get out of that fish tank and look in from the top from above you see everything you see all the fish you see the interaction you see where they all are you see everything absolutely everything going on in that fish tank this is what it's like when you raise your frequency the higher your vibrational frequency the more you are able to see the more of reality you can

3:23

see

so if you have somebody that is unaware unawakened believing the TV you know seeing you as a conspiracy theorist 90 chance they have quite a low frequency Because unless you raise your frequency you will not see it it can be staring at you until you're blue in the face you will not see it okay because you're not able to see it you you don't have the capacity to to see something that's right in front of you so until you raise your frequency and then you will see it then you will see more of it okay so if I'll give you an example if you are rushing to get out of the house and you're running late you can't find your car keys or your house keys you just can't you can't find your purse or your wallet your handbag it's just gone so guess what you're late when you calm down and you start to relax guess what your keys are right there where you always leave them but while you're rushing you could not find them that's because you're in a lower free vibrational frequency therefore you can't see you can't see you literally cannot see those keys sitting right there where you leave them all the time only when you calm down does your vision expand then you can see what's in front of you now the same with information same with information okay so you can show somebody you can give them every single bit of thing I'll use extraterrestrials you can say Okay ETS are real there's one standing right in front of you let's just say there's a tall gray seven foot gray standing in front of in front of your friend or your relative who cannot see anything that grave will be standing there talking to them telepathically communicating with them and that person will not see them or they'll say it's it's a poster or it's someone dressed up or yet some other ridiculous thing that

they come up with instead of actually admitting that it's there that it's real and this is because
5:47

their view their their mind is so limited in what they can actually comprehend in what they can comprehend therefore they can't see it they just they don't have the ability so for someone to say it's my job to wake up people or I I need to awaken others that's ego that's ego because you cannot awaken somebody who is in a low vibrational state you can't it's impossible that's why it's like banging your head against a brick wall it's like you can lead a horse to water but you can't make him drink okay this is what it's like um you know talking to people and and giving them knowledge and and everything that's going on until they raise their frequency and they are in a vibrational state where they can actually see and then comprehend the information they will always remain unaware of what's truly going on with the world always that you just can't get away from it okay there's no way you can wake somebody else up and anybody who says I woke this person up no you didn't no you didn't that person was entering an expanded awareness or expanded Consciousness State and you planted the seed for that Consciousness to expand you didn't wake them up you just planted the seed and they woke themselves up because they were in a vibrational frequency where they are now able to see so please you do not need to wake anybody up it's not your job it's not your responsibility and you can't you cannot wake somebody up you can plant seeds you cannot wake them up that is your ego talking okay and we all have ego anyone who says they don't that's an ego so you just cannot wake someone up okay if they are in a vibrational frequency where they are beginning to expand their consciousness then the seeds are planted and then you stand back and allow that seed to grow but you don't wake them up and you can't okay you can't and just one other thing I want to point out to truth is spiritualist in particular humanitarians um all of them there is no one asleep there is no one that is a sheep I can't stand that word sheep how derogatory is that oh my goodness I can't stand that word sheep in regards to people because everybody is fully aware

8:52

fully aware and awake if you like to exactly what they need at this moment in their experience in this life they know exactly what they need to know not what you need to know what they need to know for their life at this moment so to say awaken the sleepy or the Sheep or whatever other derogatory term you want to use is your ego coming through it's you putting yourself on a pedestal above another when in fact you just are living in a different reality that's it where there is more information available to you okay to you the information is available for them to access but they can't see it because they are not in that reality yet because they still have the lower vibrational frequency which means they cannot see it okay so let's not get into the habit of calling others asleep or sheep or whatever other words you want to call people because that's you showing how egotistical You Are by placing yourself above another on your journey your journey is yours their journey is theirs they do not have to mix you do not have to share it okay you do not have to wait for someone to wake up they're already awake for their reality plain and simple we're not waiting for people or more people to wake up to what's going on we're not that's something the truth is like to use as an excuse why everything's taking so long okay we're not waiting for people to wake up because they can't until they are ready whether that takes one month whether that takes a hundred years until they are ready they will not wake up regardless even the ABS won't wake them up why won't the ABS wake them up because they're not ready for it they'll just go oh what a load of well that's that's rubbish and then just continue on their daily life like nothing happened plain and simple plain and simple what we are waiting for is for all the the top level white hats to get their together and get all the banks and everything together and the financial stuff together waiting for all the rest of the wars to to play out the underground Wars and the wars behind closed doors and then we would just simply move forward we'll move forward and if they choose to come and switch realities with us then brilliant if not brilliant also it's their choice

okay it is their choice all right but please please understand no matter how much information you give someone no matter what you show them or explain to them unless they're in the Bible unless they are in the vibrational frequency to receive that information they're not going to hear it they're not going to see it so you're wasting your time okay plant the seed and allow them to act on it when they are ready okay I hope this helps you guys understand a bit more about why you cannot wake somebody up all right take care everyone bye
